Dear Sir/ Madam,

So there was always evidence for more than one death of the 5th patient crammed into 4-bed bays after all. Yet Mr Brian Stoten (Trust Chair) was adamant in the Telegraph that there wasn't and accused the Consultant's Chair, Dr Mulrooney, of being a liar. He also challenged him to put up or shut.

Mr David Roberts, the Chief Executive appointed by Mr Stoten, has towed the party line. Like a good obedient understudy he has also insisted that no such records existed.

Dr Mulrooney told the Telegraph that this current management had the chance to genuinely make a fresh start, but they have instead refused and failed to grasp this. It is incredible that Walsgrave management have tried to brush this whole sorry affair under the carpet and that we now find that at least 11 of the 5th patients died.

The victims of this mess are the people of Coventry and the Heart Specialist who spoke out, Dr Raj Mattu. The Trust has wasted millions of our pounds to keep Dr Mattu suspended and to hide these disgraceful events.

We deserve more than this and we must demand that this is now investigated.

Yours faithfully,

Mr TS Bhinder
